Experience

Bloomberg L.P., Senior Software Engineer — September 2023 to Present [London, **UK**]

- Led the development of mission-critical instant communication backend features, consistently achieving **99.99% uptime** for infrastructure supporting **200K**+ mobile daily active users.
- Engineered and optimized Kafka consumer services in Python, significantly reducing message latency by 40% and improving throughput by 25% through strategic implementation of batch processing, efficient encoding/decoding using CPython, and compression techniques.
- Designed and implemented real-time user event synchronization system using Redis and distributed
- messaging, ensuring data consistency across services.
- Explore and implement LLM powered features to tackle information overload on Instance messaging.
- Led infrastructure migration from physical to virtual clusters, improving deployment efficiency and enabling containerized scaling.
- Built scalable backend APIs for audio messaging with compliance intervention functionality, handling high-concurrency workloads.

Tech: Python (primary), Kafka, Redis, Postgres, Cassandra, RabbitMQ, Distributed Systems, Docker, SQL, C++, Bloomberg Cluster/Machines, CI/CD, Monitoring, Grafana and Humio

Cookpad Inc, Senior Software Engineer — March 2019 to September 2023 [Bristol, **UK**]

- Led iOS development for a global recipe-sharing platform (100M+ users, 70+ countries), ensuring optimal performance and scalability for iOS mobile clients. Collaborated extensively with product teams to **define product, system and data modelling specs**
- Mentored 4 developers on API consumption and client-server best practices.
- Transitioned to backend/data engineering in final year:
    - Built data logging infrastructure using Snowplow, dbt, and Redshift to ingest and enrich cross-platform event data.
    - Developed AI-powered recipe creation service using Python Flask with Server-Sent Events, delivering real-time streaming responses to mobile clients.

Tech: Python, Flask, AWS, Snowplow, dbt, Redshift, TeamCity, REST APIs, Swift

Prior Experience

- **Farfetch** | Senior Software Engineer | Shanghai, **China** | April 2018 to March 2019
    - Co-architected API gateway and data localization strategy for China market, reducing API/CDN timeout issues by 65% through infrastructure redesign.
- **Ping An Group** | Senior iOS Engineer | Shanghai, **China** | Dec 2015 - April 2018
    - Built iOS mobile solutions for one of China's largest financial services conglomerates, working within regulated financial systems and compliance requirements.
- **Nintu Oy** | iOS Developer | Helsinki, **Finland** | Feb 2014 - Aug 2015
- **Jerone Group Oy** | Software Engineer | Tampere, **Finland** | Nov 2013 - Feb 2014
- **SIQ BASKETBALL** | Software Engineer | Helsinki, **Finland** | Jan 2013 - Jun 2013

Education

M.Sc. in Information Technology - University of Tampere, **Finland** - Thesis
B.Sc. in Information Technology - Huazhong university of science and technology, **China**
